	MR Credit 3 Waste Management	High density polyethylene plastic buckets for packaging are reusable and recyclable, and are delivered on reusable pallets.	High density polyethylene plastic buckets for packaging are reusable and recyclable, and are delivered on reusable pallets.	Recyclable paper bags and are delivered on reusable pallets.	Recyclable paper bags and are delivered on reusable pallets.
Footnotes					
¹ Use of building materials or products that have been extracted, harvested or recovered, as well as manufactured, within 500 miles of the project site. If only a fraction of a product or material is extracted/harvested/recovered and manufactured locally, then only that percentage (by weight) shall contribute to the regional value. ² Manufacturing refers to the final assembly of components into the building product that is furnished and installed by the tradesmen.					
³ Combines recycled content, emissions and local production. ⁴ The final step in manufacturing, the addition and blending of pigments and colorants, is usually performed by regionally-based dealers. The percentage weight of pigments and colorants varies depending on the color selected. Low and zero VOC pigments and colorants are available. Testing is in progress.
